

As a State Representative from Newport New Hampshire, a low socioeconomic community, I know that seamlessly infusing digital learning throughout the curriculum is a prerequisite for students to graduate from high school with the skills and knowledge they need to succeed in today's global economy. Access to high-speed broadband is the key to allowing modern teaching and learning to occur in all schools across the country. We need more support to bring our student to the same playing field as those wealthier communities/state that support their schools digital services.
